

Council of the Isles of Scilly SEN Pathfinder transitional arrangements

The Isles of Scilly has less than 15 children and young people eligible for transfer from their existing statements of SEN or Learning Disability Assessments to a single Education, Health and Care plan.

As a SEN Pathfinder authority we have been working closely with children and their families on transition arrangements and have linked the SEN annual review process to the development of new EHC Plans. We fully anticipate all students with statements to be transferred to an EHC plan within 14 weeks of their final Statement annual review and for the whole cohort to be established on single plans by April 2015.

We will continue to work closely with the SENCO of the Five Islands School and our health and social care partners to ensure that new entrants to the SEN process benefit from prompt, child centred intervention to remove any barriers to learning.
