16 OCT 2014

COUNCIL OF THE
ISLES OF SCILLY

Planning Reference P/12/084/FUL.

Although there seems to be very little value in making further objections to yet more amendments to the building works at High Pines, we are nevertheless disappointed to say the least, by the apathy shown by the Isles of Scilly Planning Department and local Councillors who seem to be unable to impose any finality over the continual demands made by the owners of the property.

The letter of notification arrived while we were on a short holiday, and so of course this has allowed no time to form or submit objections once more. A very shrewd move by all of you.

We wonder if the Councillors and Planning Officer who make these decisions actually realise what a negative impact these vast alterations are making, and we wonder too how many of these Councillors, including

The Planning Officer have actually visited the property again to fully appreciate the serious concerns we have already expressed with the original vast proposals, even before this latest set of amendments. Have they really taken in how detrimentally, raising the roof again will affect us in Minatto?

We may not, by law, be entitled to a view, but we are certainly entitled to light.

What is the point in voting for local Councillors when once in office the views and pleas of locals for common sense, are for the most part ignored. We will have very little confidence in councillors in the future, and one wonders just how much life on Silly is valued by these people.

Rod & Tansy Tugwell.

Minatto. Macfarlands Down.
