Dear Mr Pearce,

Planning consultation: Construction of an observatory comprising two pre-fabricated glass fibre domes, a timber clad warm room with a slate tile roof all surrounded by a 1.8m square panel timber fence

Location: The Community Hall, Middle Town, St Martin's, Isles Of Scilly

Thank you for your consultation on the above dated 19 October 2016 which was received by Natural England on the same day.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

The Wildlife and Countryside Act 1981 (as amended)

The Conservation of Habitats and Species Regulations 2010 (as amended)

The National Park and Access to the Countryside Act 1949

Natural England's comments in relation to this application are provided in the following sections.

Statutory nature conservation sites – no objection

Natural England has assessed this application using the Impact Risk Zones data (IRZs). Natural England advises your authority that the proposal, if undertaken in strict accordance with the details submitted, is not likely to have a significant effect on the interest features for which the Isles of Scilly Complex (SAC) has been classified. Natural England therefore advises that your Authority is not required to undertake an Appropriate Assessment to assess the implications of this proposal on the site's conservation objectives.¹

¹ This reply comprises our statutory consultation response under provisions of Article 20 of the Town and Country Planning (Development Management Procedure) (England) Order 2010, Regulation 61 (3) of the *Conservation of Habitats and Species Regulations 2010 (as amended)*, (The Habitat Regulations) and Section 28(l) of the *Wildlife and Countryside Act 1981 (as amended)*.

In addition, Natural England is satisfied that the proposed development being carried out in strict accordance with the details of the application, as submitted, will not damage or destroy the interest features for which the Plains & Great Bay (St Martin's) and the St Martin's Sedimentary Shore SSSI's have been notified. We therefore advise your authority that these SSSI's do not represent a constraint in determining this application. Should the details of this application change, Natural England draws your attention to Section 28(l) of the Wildlife and Countryside Act 1981 (as amended), requiring your authority to re-consult Natural England.

Protected landscapes

Having reviewed the application Natural England does not wish to comment on this development proposal.

The development however, relates to Isles of Scilly AONB and we therefore defer to you for comments regarding location and wider landscape setting of the development and whether or not it would impact significantly on the purposes of the designation.

Protected species

We have not assessed this application and associated documents for impacts on protected species.

Natural England has published [Standing Advice](#) on protected species.

You should apply our Standing Advice to this application as it is a material consideration in the determination of applications in the same way as any individual response received from Natural England following consultation.

The Standing Advice should not be treated as giving any indication or providing any assurance in respect of European Protected Species (EPS) that the proposed development is unlikely to affect the EPS present on the site; nor should it be interpreted as meaning that Natural England has reached any views as to whether a licence is needed (which is the developer's responsibility) or may be granted.

If you have any specific questions on aspects that are not covered by our Standing Advice for European Protected Species or have difficulty in applying it to this application please contact us with details at consultations@naturalengland.org.uk.

Local sites

If the proposal site is on or adjacent to a local site, e.g. Local Wildlife Site, Regionally Important Geological/Geomorphological Site (RIGS) or Local Nature Reserve (LNR) the authority should ensure it has sufficient information to fully understand the impact of the proposal on the local site before it determines the application.

Sites of Special Scientific Interest Impact Risk Zones

The Town and Country Planning (Development Management Procedure) (England) Order 2015 requires local planning authorities to consult Natural England on "Development in or likely to affect a Site of Special Scientific Interest" (Schedule 4, w). Our SSSI Impact Risk Zones are a GIS dataset designed to be used during the planning application validation process to help local planning authorities decide when to consult Natural England on developments likely to affect a SSSI. The dataset and user guidance can be accessed from the data.gov.uk website

We would be happy to comment further should the need arise but if in the meantime you have any queries please do not hesitate to contact us.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

We really value your feedback to help us improve the service we offer. We have attached a feedback form to this letter and welcome any comments you might have about our service.

Yours sincerely,

Victoria Kirkham
