Attention Planning Officer
Council of Isles of Scilly
Town Hall
St Mary's
TR21 0LW

To whom it may concern

Planning application Application P/16/111
Site address:
Kenython, Norrad, Bryher

We would like to write in support of the above application. We can well see that Island Fish needs different premises to operate more efficiently and to have a prospect of expanding. Their business is a natural and ideal fit to sustainable and in character development of the island, utilising natural resources and expertise in a manner which is so characteristic of such an island community.

We believe that Island Fish has been very well received by visitors and islanders alike giving a new dimension to real local food available on the islands – complimenting other successful enterprises like Hillside Farm. It is a sad and a nonsense that a full range of locally caught seafood has not been available till now.

The details of the plans submitted are also completely in keeping with the existing structure on the site now and will not be at all detrimental to the look of that important part of the island near the quay at Bar. The garden of Kenython is of significant benefit to visitors and locals alike – representing many years of work by the previous tenants of the property and a an important “shop window” feature for people arriving at Bar. We know it is the intention of Island Fish to maintain it as now – but we feel that this should be safeguarded with a specific planning condition.

Please record our support.

Yours sincerely

Martin & Fiona Nicolle
