Subject: Planning Application P/16/129

Dear Lisa

Regarding the above planning application: My wife and I will be objecting to this application to turn the existing garage into a house. I am keen to ensure that the officers involved understand the full impact that this building will have on the immediate vicinity which of course, includes our property. I am producing photographs to support our objection, but two-dimensional images do not represent height and perspective as clearly as the human eye. Therefore, would it be possible for a "site visit" by those concerned with the planning decision to be arranged? In this way, I can demonstrate our concerns fairly.

Kind regards

David and Michaela Hawkins
