RE: Bristow, St Mary's, Isles of Scilly

Written Specification for replacement roof covering to Bristow:

Materials to be used:
Natural slate 250 x 500mm (Brazilian)
Head lap of 100mm nailed with copper nails
Breathable felt secured with staples
2x1 tanalised battens

The existing roof covering is wet laid scantle slate with a 70mm head lap.

Waste Management Plan:

The spoil arising from the project consists of timber lath, natural slate and lime mortar.

It is proposed to dispose of the masonry aspect at Pendrethan Quarry where it will be crushed and recycled as hard core.

It is proposed to dispose of the timber aspect at Moorwell Waste Management Centre.

The spoil will be transported to the disposal sites by way of a licensed 3.5ton tipper truck.
