

Planning Application
P/18/090/FUL

Sonia Crompton
2, Rosevean House
Church Rd
ST Mary's
Isles of Scilly
31.12.18

Objection to above proposal.

In reply to the above application for Men a vaur Church Rd: I have strong concerns for more water usage on ST Mary's.

I am the owner and full time resident on the Island of 2, Rosevean. My first floor flat is joined to Men a vaur which has 6 ensuite double bedrooms. Rosevean has 4 flats with 7 double bedrooms. Joined to Rosevean on the right hand side facing the planned build is Gorregan with 6 double bedrooms. Next door but not joined to Godolphin House this is a block of 9 flats each with 2 double bedrooms.

Branksea Close already have problems with their sewers overflowing another 12 people using them would add to the problem.

The noise level from 12 people sitting outside from Men a vaur is loud enough but adding another 12 people from this new build would be horrendous.

I would also be very disappointed to lose yet another green area on Scilly. I believe there is an old well in that part of the garden plus old apple trees. This could mean other people could build holiday accommodation in their gardens aswell....

Do we really need anymore visitors to the

Island? Where are our children going to live with all these areas being used for holiday homes and accommodation?

Please take these points into consideration when discussing this planning application.

Your sincerely

S Compton
