Subject: Planning Application Representation; P/-18-/-090--

Dear Ms Walton

We would like to register our objection to this application on two points

1. We believe that the sewage system in this area which is routed through Rams Valley is at full capacity. The council regularly have to clear the sewer in Rams Valley and we consider that remedial work is necessary before any more properties are joined to it.

2. We believe that that part of Church Road is already fully developed causing parking and traffic issues. Whilst the application is for a holiday let it will generate additional traffic problems. The existing holiday let at Men-a-vaur appears to have been let to builders for the winter period who have had their vans parked in an already crowded Church Road.

Yours sincerely
Nick and Angela Jenkins
