Ref: April Cottage - Replacement
Conservatory roof - Planning Application

To: Planning department,

I am writing a letter of support re: the above planning application, on behalf of my mum, Mrs. Janet House.

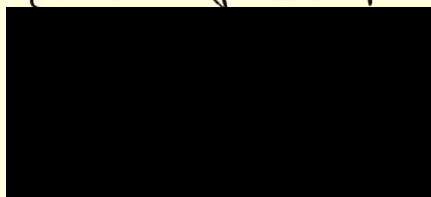

The existing conservatory roof is currently too hot during the summer months and extremely cold during the winter months. In addition to these extreme temperature differences, the roof is beginning to deteriorate in many areas.

We would like to replace the current roof (plastic panels) with a more sustainable warm style roof, the tiles of which will match the colour of the main April Cottage house.

The new roof will not only enhance & improve the fabric of the conservatory but it will also prove more economical to heat. It will enable the conservatory to be used year round, rather than at the moment, which is rarely. The conservatory is already existing and we are not requesting to increase the size in any way. The new roof shape will be exactly the same as the existing roof, but much more economical in the long term.

I enclose a cheque for £206.00 to cover planning application costs.

Yours faithfully,

Hicks (daughter to Mrs. J. House)

J.C. House
