Hi Andrew

I've been asked by my customer to submit the forms for a planning application to change the windows at the rear of his property at Lowena.

The windows are currently single glazed timber and my customer wants to change them to Pvcu double glazed to enhance energy efficiency within the property. The building underneath, Sandpiper Flats, have brown / rosewood PVCu windows and will match in nicely.

The existing timber windows will have the glass separated and will then be cut up in to smaller pieces then sent to the recycling centre separately via Richard Hand Haulage.

Please find attached the forms. If there's anything I've missed or you need any more details please let me know. My customer is going to pay for the application today reference 'PAPPBANKCH'.

Kind regards

Kris
