It is in the middle of a terrace of houses having symmetrical principal features with granite stone elevations and hung slate at first floor level, timber cladding on the gable ends of the half-dormers, and white fenestration with inset front doors.

The terrace of dwellings has a mix of white timber and UPVC fenestration and runs opposite the row of Foredeck shops and the Silver Street Gallery which have recently replaced their shop front windows in timber.

This proposal is for the replacement of the existing white painted timber windows and door on the roadside elevation with white UPVC with no change to the overall dimensions of the openings.
