Hi Lisa

P/21/095/FUL

We have no issue with the April Cottage development in theory, though we have serious concerns in regard to parking.

You will know from our previous correspondence on the matter, what a dreadful situation Church Road already has to deal with in terms of parking.

Men a Vaur stated they wouldn't need parking for their new build.....yet, now they have the entire frontage cordoned off whilst building works are underway. This has taken away at least three parking spaces.

Brian is a 'Blue Badge' permit holder. With his Alzheimers Disease, it makes it hard for him to have to park down by the chapel some days as there is no room on Church Road. Both sides are now invariably 'parked up' with vehicles. This is dangerous. There is no visibility with the large container in situ outside Men a Vaur.

It will only get worse...as Men a Vaur's 'disabled' guests and any other guests from the two lets will hire golf buggies! As you know in the summer season we've had up to five Golf Buggies parked on Church Road. It is not fair on the residents.

April Cottage, if split into three, could potentially have six vehicles if there were two drivers in each household.....where on earth will they park?

Day in, day out we witness traffic issues....it's a good job the fire engine has the capability to mount kerbs.
