Council of the Isles of Seikky
Planning Department
Town Hall
St Marys, 18th of Seikky

Dear Mr King,

Please find enclosed my Planning application with regards to my Conservatory at the above address. I also enclose the Site and Location Plans together with two Photographs of the conservatory.

I seek permission to replace the existing glass roof, as shown in the Photographs, with a solid tiled and insulated roof. The double glazed glass on the roof has started to lose gas and now shows condensation between the glass.

The conservatory at the moment can only be used at certain times because in the summer it gets too hot and in the winter too cold. Using any form of heating is extremely wasteful because of the heat loss through the roof.

The size and shape of the new roof will remain the same as the glass one and the colour of the tiles used will be as near as possible to the rest of Moyana's roof.

With regards to Site Waste Management, I shall seek the guidance of the Council's Waste + Recycling Department and make the necessary arrangements for appropriate disposal.

Yours sincerely,
