Dear Liv

Please find below SWW response in relation to this planning application.

In relation to the a connection to the drinking water network via the applicants private 7500l storage tank South West Water able to support

As the proposal is not looking to connect foul or surface water flows to the public network South West Water do not have any comments to make.

As part of South West Water's strategy to improve the drinking water and waste water infrastructure on the islands an investment programme has been developed which will be focused on achieving a reliable wastewater service including being able to cope with extreme conditions, protecting the environment and providing long term benefits to the community with the Company committed to support the necessary improvements in water and wastewater services on the islands so that services are in line with standards on mainland UK by 2025 or 2030 in the case of Tresco. This includes the ability to provide new water and sewer connections to the network and therefore it is recommended that the applicant liaises directly with the Company to discuss the potential of connections to public assets.

Should you require anything further from us on this application, please let us know.

Kind regards
Helen
