Site Description and Proposed Development

Ajax flat is set over two floors at 10 Lower Strand above a ground floor commercial unit. This proposal relates to the windows at first and second floor levels on the south facing rear elevation of the property. [Google Street View](#)

The building is of granite construction with a fibre cement slate roof, dormers at the front and a wide dormer at the rear and the windows are dark stained single glazed timber windows. The neighbouring property has a similar appearance except the dormers at the rear are individual and the windows are of a different design being brown at second floor level and grey painted timber at first floor level with white composite(?) cladding around. The property overlooks Tom Chudleigh's Yard, a modern development of two social houses and beyond them is the grade II listed Lemon Hall.

This proposal is to replace the existing windows in the same style but double glazed UPVC in a brown finish. Reasons for the replacement with UPVC are given as maintenance, accessibility and the neighbouring property having brown UPVC already.
