**Re planning No:**

I am writing to register my full support for the planning application being made by Tom and Sophie Smith.

I believe that the application to install two shepherd huts on to the farm is a wonderful idea. The site they have earmarked is entirely in keeping with the layout of the farm, utilising a space that is bounded by other farm buildings. The site will provide a discreet and private area : unobtrusive and out of sight from the island road and footpaths. The site will also be screened by planting and stone walling. The design of the shepherds huts means they will fit well into their setting and have strong eco-credentials.

The planning application to provide two additional letting units which will cater well for the ongoing, growing demand for holiday accommodation on the island, which in turn support our Post Office Stores, café and pub.

Tom and Sophie and their growing family are a true asset to the island. They run an exceptionally well organised farm and cured meat business; but the farm is tiny and the additional holiday accommodation would help to secure the future of this little family going forward.

I totally support this application.

Yours sincerely  
Chris Simmonds
