Stephen Asten
6 Normandy house, St marys
Tenants of Normandy house

As to your planning request to put a solar array in the field opposite the pool , I'm am totally against it as I was when you applied over 10 years ago . The noise already from the rain on the swimming pool dome is already loud enough as I stated last time and to add more hideous plastic will make it even worse , and they are unsightly which the angle they have been planned for will reflect the sun right at our flats , and If you look where you would like to put them , as the lifeguards keep telling me this is exactly where the fire escape route is so blocking that area off is highly illegal after all the fire precautions all locals have had to make this winter , and last time you sent a letter to all residents of Normandy house but this time we have had too find out via a small notice on a telegraph pole . Sort of a sneaky way of trying to get the plans passed , and knowing there is 3 empty flats hoping for less complaints. And surely preparing the land on April 3rd before its even passed is a little bit presumptuous. And on another point who is going to upkeep the land? Because the staff can't even look after the current area where the bike rack is and adjacent field where said fire escape route is because I've been doing it for 4 years out of my own time and money because of the state of the place and picking up litter your customers leave scattered about the area , you can't even clean the guttering on the office building so I can't see the lifeguards strimming around the solar panels. So on behalf of the residents and future residents I would like to object on this monstrosity . And if the lady who has applied for it actually lived on the islands she would of realised it was turned down last time and save you wasting more council tax money on bringing this to planning again , yours sincerely Stephen Asten.
