Subject:

FW: P/24/061/TWA: Allotments, Moorwell Lane, St Mary's

Hi Andrew,

Abby has passed me on your email as I am the one who asked her to submit the planning.

The reason for the need to pollard these trees as they have become very thick and are becoming a bit heavy on the slope. These are now causing a lot of shade over both the residential garden above and the allotments below. Ensuring the allotments have a good amount of light, especially the light from the west which allows for better winter growing. There are 6/7 mature elms in this location which have been previously pollarded (more visible from my photos attached from the winter). It is clear from the difference between your photo and mine from last year the extent of the growth within that last year.

Please let me know if you need any further information from me.

Kind regards,
Twiga
