

Site Waste Management Plan

Silver Street Gallery
5 Silver Street
St Mary
TR21 0PZ

Responsibility for disposal of materials: As this is a small internal renovation waste materials will be collected and sorted on site by individual trades as its not practical to appoint a main contractor for a program of this size. Mark Ward will be responsible for disposal of materials

Waste to be generated

Strip out of electrical wiring, light fittings and electrical sockets.
Excess and offcut materials after fit out, expected to be plasterboard, insulation, stud work timber, wood flooring, pipe work for plumbing and tiles.
An existing WC and wash basin will be removed.

Management of the waste

Recycled where possible and council waste facility where recycling is not possible.
Steps will be taken to ensure wastage is minimal.

Contractor to be used

The materials will be transported and recycled by:
Richard Hand Haulage
Site 7,
Porthmellon Industrial Estate
St Mary's Isles of Scilly TR21 0JY

Material to be placed in the appropriate recycling facility at

Porthmellon Waste Management Site
St Mary's
Isles of Scilly
TR21 0JY

How the quantity of waste generated by the project will be measured

The quantity of waste will be minimal as there is no construction the scope of works in summary is to fireproof between the gallery and the proposed residential space, then fit out of the residential space. The waste will be sorted into the appropriate bags and will be sized by Richard Hand as part of the disposal process.
