We would like to object to this planning application on the grounds of these container accommodation units being an eye sore, completely out of keeping for Bryher and could open the floodgates for further applications for such accommodation. It appears on the planning location map that the septic tank is in the wrong location.

Bryher residents have recently been told that no further increases to the current waste systems can take place until South West Waters new sewage system is up and running.

I currently empty the septic tanks on Bryher and the current septic tank which these pods would feed into is of old brick construction and is of bad repair.
