There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).

Description

Please describe details of the proposed development or works including any change of use

The existing render on the property is cracked and rainwater is penetrating through the render, causing leaks inside the property. Having repaired the render in the past, this has only provided a short term fix. We have been advised by local builders that the only way to ensure the property is watertight is to have a waterproof layer covering it. We propose to cover the front elevation and right hand elevation of the building in white Fibre Cement Cladding. There will be no change of use for the properties.

Proposed materials and finishes:

We propose to cover the front elevation and right hand elevation in Cladco 3.6m white smooth finish Fibre Cement cladding board. We would use a timber batten with high load 100mm dpc behind it. A breathable waterproof membrane would then be fitted. At the base of the cladding there will be an insect proof breather which is stainless steel fitted. The product we intend to use as an A1 fire rating, backed by a 10 year guarantee. The board specifications: - Length 3.66m - Width 210mm - Thickness 12mm - Weight (approx) 13.11kg The boards will be installed horizontally.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

☐ Yes

☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Note: Please read the help text for further information why developments may be exempt or not in scope.

Lisa advised me that as the property is in a conservation area we would need planning permission to erect cladding.

She recommended that we send photos of the current wall covering and an indication of what it will look like with the white cladding, together with examples of similar changes on other properties in the vicinity.

Lisa also suggested that we include photos of the existing cracks and damage caused by the leak.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
